

COMMISSIONER FOR PATENTS

FEB 27TH, 2002.

U.S. PATENTS.

SUBJECT → APPLICATION FOR
PATENT

RESPECTED AUTHORITY,

MY CAREER AND INVOLVEMENT
WITH TIRES AS A QUALITY ENGINEER FOR GOODYEAR
TIRES WAS ALWAYS MAKING ME TO THINK DEEPLY
ON THE PROBLEM OF RESCUING THE HUGE JUNK
DEPOSIT OF OLD USED AUTOMOBILE TIRES FROM
ENVIRONMENT.

I WANTED TO DO THAT IN A POSITIVE MANNER
TOWARDS THE BENEFIT OF HUMAN BEINGS
WITHOUT BURNING THE TIRES, AS THE BURNING
RESULTS IN TOO MUCH POISONOUS GASES AND
ADDS TREMENDOUS NEGATIVE TO "ENVIRONMENT",
WHICH IS A MAIN TOPIC OF THIS CENTURY.

SO I HAVE DEVELOPED AN
IDEA OF RECYCLING THESE USED OLD TIRES
INTO SHOE SOLES, BY WHICH WE CAN PROTECT
OUR ENVIRONMENT.

THESE SHOE SOLES OF TIRE ARE HIGHLY DURABLE,
HEALTH ORIENTED, INSULATED TO KEEP OUT HEAT
& COLD AND CARRIES A GREAT HOPE FOR POLLUTION
FREE DAYS AHEAD. NINE STAGES OF PROCESS WITH
HAND MADE DRAWINGS ENCLOSED.

WITH BEST REGARDS.

NOTE → ATTACHED

- 1) A LETTER FROM EPA
USA.
- 2) NINE STAGES OF PROCESS.
WITH DRAWINGS.
- 3) PREFACE OF A TOM BOOK
WRITTEN BY ME.
- 4) PATENT APPLICATION FORMS.
- 5) A CHECK FOR \$370.00

SINCERELY
Vinod Somi

V. K. Soni

An Introduction

V. K. Soni, the author of 'Total Quality Management' is a personality with celestial intellect. Any word added in

these lines for him will carry real meaning as he believes that the extent of quality is directly related with the extent of purity in the views of a person concerned. He carries a systematic, practical and result oriented trends with him.

A person can not afford to be negative towards quality after going through his views. A long association as a Quality Engineer with a Ohio, U.S.A. based multinational company (Good Year) and extensive exposure in different aspects of quality management have made this science graduate attain a platform of an authority in Quality Management. An excellence for taking out the real quality potential of a person is an asset with him. He is also on the advisory panel of BIS and Trade Authority. Repeated worldwide visits and opportunities to advice people from different walks of life have added a lot to his grace.

Preface

I have a very sincere desire to create a quality revolution. This book 'Total Quality Management' is practically total within it and intends to make the readers attain a potential to discover new quality trends through a very systematic and disciplined manner. In the coming days, no one can even think to survive if one is there without a boon known as 'creativity' or a potential to discover more and more as per the changing requirements of the customer. I never want to let the things go in the manner as it was there with M/s Deming and Juran, who could not give earlier benefits to U.S.A., their parent country. Japan respected their views and took total benefits. I want people to add my experiences to their own and make their personalities well equipped to face the problems coming in their way towards achieving total quality management. This book will make you drive on a route where every chapter indicates a milestone and you are sure to achieve your goal of perfection after the completion of last chapter. Then total quality management will become a part and parcel of your life-style and habits. More and more you will distribute, more and more the same will shine within you and ultimately add a grace to your country whatsoever it may be.
